Comparison:
Between the two design, major difference is navbar, for final design we'll the top nav.

Global Variation:
May keep in the final design, but history has a lot of content already, so we don't want to over load it.

Mobile view:
In next design, we can review the content pages other than the home page.

Nutrition page:
Todo for next version. In terms of content, no need to go into the chemical details of things, but just its simple composition (i.e. burger patty, bun, etc.)
